CONTENTS

Editorial	vii
Preface	ix
Gas source molecular beam epitaxy of InP, GaInAs and GaInAsP M. B. PANISH	1
Liquid phase electroepitaxy of semiconductor compounds T. BRYSKIEWICZ	29
Silicon molecular beam epitaxy Y. SHIRAKI	45
Implanted silicon epitaxy by thermal and laser processing S. U. CAMPISANO	67
LPE growth of InGaAs/InP and AlGaInAs/InP structures K. NAKAJIMA	97
LPE of buried heterostructure laser devices R. A. LOGAN	215
Characterisation and kinetics of $Al_xGa_{1-x}As$ by organometallic-CVD H. PRAKASH	243
MOCVD $Al_xGa_{1-x}As$ solar cells H. PRAKASH	257
An improved OM-CVD growth model for III-V semiconductors—metalorganic halides for the CVD growth H. PRAKASH	265
LPE growth of InP and related alloys H. NAGAI	271
Epitaxial growth of InP and related alloys B. L. SHARMA	295
MO-CVD growth of InGaAs using Me_3Ga, $AsMe_3$, AsH_3 and Me_3In or Et_3In and analyses of adducts formed during the growth process C. H. CHENG, K. A. JONES and K. M. MOTYL	319
Subject index	335
Compound index	341
